WONDER WIN MODULE from the The Diagnostic Box

- Chrysler/Dodge/Jeep vehicles have a big problem with the WIN modules needing to be replaced. (Ignition switch for Fobik/Pod style)
- Right now the only source is calling the dealer with VIN and hoping they have it in stock. AND you have to use the DEALER COMPUTER with a subscription to program it in! This is costly and timely. So because of these hassles most locksmiths wont even consider replacing the WIN MODULES.
- Now with the WONDER WIN a locksmith needs to only stock what he wants. Two units will cover 80% of these cars on the road. (WIN4 and WIN4RS)

There are only four types.

WIN 2, WIN 2RS, WIN 4RS and the WIN4

WIN2/WIN2RS uses two bolts attaching it to the car.

WIN4/WIN4RS uses 4 bolts attaching it to the car.

- SIMPLE PLUG AND PLAY... then the locksmith uses his TCode/MVP, Zed Full, Smartbox, or whatever programmer he may have to simply program in new keys using the provided PIN on each
- WONDER WIN MODULE. THAT'S IT!
- Vehicles using a REMOTE START will need the appropriate WONDER WIN MODULE but use RS after for part. (SO WIN4RS is simply a WIN4 with an extra plug in for vehicles that have a REMOTE START.)
- These WONDER WIN MODULES are original new MOPAR parts. We just establish an individual pin for each unit.
- Each WONDER WIN MODULE comes with a TWO YEAR WARRANTY.
